

Supplementary Table I. List of aerosol generating procedures (AGPs) and non-aerosol generating procedures (Non-AGPs)

AGPs	Non-AGPs
Endotracheal intubation	Closed suctioning with invasive ventilation
Open respiratory and airway suctioning	Non-invasive positive pressure ventilation
Tracheostomy care	Bi-level positive airway pressure
Cardiopulmonary resuscitation	Nasopharyngeal aspiration
Sputum induction	Nebulization (but this procedure should be performed in an area physically separate from other patients)
Bronchoscopy	Chest physiotherapy is not considered an AGP but a surgical mask should be worn by the patient as well as HCWs
Aerosolized administration of pentamidine or other medications	
Pulmonary function testing	
Autopsy, clinical, surgical, and laboratory procedures that may aerosolize	
Pathogens, such as operating bone saws, centrifuges, blenders, and	
Aspiration equipment	
HCWs, healthcare workers
